What patients think

What is national patient survey information?

The information below is taken from the 2011 GP Patient Surveys. People registered at general practices across England were asked how easy or difficult it is for patients to see or speak to a doctor at their practice. The graphs for each question show the results for this practice together with a comparison figure for other local surgeries and for England as a whole. More detailed results from the GP Patient Survey 2010/11 are available from the GP Patient Survey website at: www.gp-patient.co.uk.

In general, are you satisfied with how easy it is to get through to someone on the phone at your doctor's surgery?
