

THE GP PATIENT SURVEY

Key results 2008/09 for
PARROCK STREET SURGERY (G82062)

Technical Details of the GP Patient Survey 2008/09

- Ipsos MORI administered the GPPS on behalf of the Department of Health (DH).
- Questionnaires were sent to 5,660,217 adult patients registered with GP practices in England w/c 5 January 2009. Reminders were sent to non-responding patients in February and March.
- Questionnaires received by 9 April 2009 are included in the survey results, with duplicates excluded. The overall response rate to the survey is 38%, based on 2,163,456 completed responses.
- Patients were able to complete the survey on paper, online and over the phone, including in 13 other languages.
- 793 questionnaires were sent to adult patients registered with this practice code G82062, and 248 were returned completed. The unadjusted response rate is therefore 31%. The number of patients in a practice who were sent questionnaires was determined individually for each practice.
- Computer rounding means that combined percentage scores are not always the sum of the individual percentage scores. For example, the total percentage 'satisfied' will be calculated from the actual number of patients answering 'very satisfied' and 'fairly satisfied', and not the sum of the two percentage results.
- Where results do not sum to 100, this is due to multiple responses or computer rounding.
- An asterisk (*) indicates a percentage of less than 0.5% but greater than zero.
- This document outlines answers to a number of key questions from the survey. Full practice results can be found at www.gp-patient.co.uk/results.

48 hour booking and booking ahead

Able to see doctor on the same day or next 2 days the surgery was open

- % Yes
- % No
- % Can't remember

Able to get an appointment with a doctor more than 2 days in advance

- % Yes
